EDUCATION

Tashkent University of Information Technology - TUIT

Tashkent, Uzbekistan

Bachelor in Computer Engineering

Sep. 2020 – July 2024

GPA: 4.23 / 5.0

- Relevant Coursework: Introduction to Algorithms, Computer Vision, Programming Technologies and Educational Practice, Discrete Mathematics, Linear Algebra.

WORK EXPERIENCE

DigitAgro.uz | *Mobile developer*

July 2026 - now

An organization focused on digitalizing agriculture

- Developing mobile apps
- Map caching
- Route Calculation

Uniconsoft | *Mobile developer*

Sep 2025 - May 2026

- Developed a real-time messenger app supporting private, group, and channel chats using Flutter, Socket.IO, and BLoC architecture
- Engineered voice message recording system with custom amplitude waveform visualization and swipe-to-cancel gesture
- Built chunked file upload/download engine with resume capability for reliable large file transfers
- Integrated Remote Config for feature flagging (maintenance mode)
- Implemented Quill-based rich text editor for message composition with URL detection and @mentions
- Designed full localization system supporting 3 languages (EN/RU/UZ)
- Built offline-first data layer using Drift/SQLite with reactive streams for real-time UI updates
- Created group/channel management flow with privacy controls
- Set up CI-ready build pipeline with obfuscated release APK generation

Milliy Go | *Mobile developer*

March 2024 - Jan 2025

- Links: [Milliy Go Client](#) | [Milliy Go Driver](#)
- Milliy Go is a reliable taxi services application
- Application is based on Yandex Map
- Implemented Flutter localization

- Set up a simple audio player with background and notification support
- Worked with Dio, Retrofit, and Freezed
- Developed a task management application for company employees
- Built an online chat using Firebase Realtime database
- Firebase Crashlytics integration for error and crash monitoring
- Application analytics integration and reporting
- Released and maintained the **Inter Nation Staff App** on [Google Play](#) | [App Store](#)
- Released and maintained the **Inter Nation Student App** on [Google Play](#) | [App Store](#)
- Created an online battle game for students ([App Presentation](#))

Viento Group | *Internship*

Jan 2022 - March 2022

- Utilized BLoC for state management in Flutter applications
- Developed a production-level mobile application for online courses
- Implemented features for purchasing courses and taking tests after completion
- Gained hands-on experience in professional app development workflows

FREELANCE

Makro App | *Mobile developer (Remote)*

July 2025 - now

- Contributed to UI improvements to enhance user experience and usability
- Firebase analytics to monitor user behavior
- Updated the **Makro App** on [Google Play](#) and [App Store](#)

Harry's Burger & Coffee | *Mobile developer*

- Windows kiosk application for cashier and chief
- WebSocket is used to receive real-time orders and change their status
- Payme, Click integrated and esc_pos_utils used to print thermal receipt

SKILLS

Technologies & Frameworks

- Flutter
- Firebase (analytics, crashlytics, notification, real-time database)
- Yandex Map
- Git
- WebSocket
- RestApi

Coursework

- OOP
- Design Patterns
- Data Structures & Algorithms
- Clean Code
- Software Architecture
- Quality Assurance

- Clean Architecture
- MVVM

- Isolates
